

Ticket ID	Alert Message	Severity	Details	Ticket status
A-2703	SERVER-MAIL Phishing attempt possible download of malware	Medium	The user may have opened a malicious email and opened attachments or clicked links.	Escalated

Ticket comments
This alert has been escalated to a Tier 2 SOC analyst due to confirmed malicious activity on the endpoint. The phishing email contained a password-protected attachment that was successfully opened by the user, resulting in execution of a verified malicious file. File hash analysis confirmed the attachment as malicious, and the activity triggered security alerts indicating potential system compromise. Escalation is required for further investigation, including determining the full scope of impact, identifying potential persistence mechanisms, and ensuring proper containment and remediation of the affected system.

Additional information

Known malicious file hash:
